

## Metal Channel Letter Signs

Create a dramatic halo lighting effect with reverse Metal Channel Letters. Our Metal Channel letters are ideal when you're looking for letters with a greater depth. We insert high-quality, low-voltage LED modules inside our fabricated Metal letters and provide a Lexan backer. The letters are floated off the wall with spacers and the results are breathtaking, both indoors and outdoors. With so many styles to choose from including halo lit and open channels with exposed neon, we can create the exact look that best delivers your brand to the target audience.

Taking your concept and turning it into a visually stunning reality is our job. We use the latest technology and highest quality products to create custom signs for your clients.

We understand that your time is valuable, and make it a priority to respond to all quotes within 1 business day.

With our NEW and improved true WHITE UV-coated Polycarbonate, you can be confident that your sign face will not change colour.

**Trade Only** We Deliver in GTA area and Pack & Ship to all over Canada & USA.
